EDUCATIONAL FILM SHOWS AT
U. M. S. RADIO THEATRE
"GOPAL BAGH" AVANASHI ROAD, COIMBATORE.

Preface

The following films are shown at U. M. S. Radio Theatre, "GOPAL BAGH", Avanashi Road, Coimbatore.

Erpi Class Room Theatres' educational films on Health, Safety, Engineering, Agriculture, Industry etc., and a film on different subjects in Tamil.

Harmon Foundation's productions on Health, Industry and Medical.

Bray Pictures' productions on Automobile Engineering, Personal Hygiene etc.

Edited Pictures System's productions on Industry, Geography, Physics etc.

Aetna Casualty & Surety Co., the Bicycle Manufacturers Association's productions on safety.

State Commissioner of New Jeresy's productions on safety.

General Motors Overseas Corporation's productions on Highway Safety etc.

Mr. Harold M. Kuckuk of Rufus King High School, Milwaukee's productions on Safety.

Colorado University's productions on Recreations and on Rocky mountains.

Herman A. Devry's productions on Geography, Electrical Engineering etc.

Society for Visual Education's productions on Business career, Geography, Physics, Metal Engineering, Physiology, Hygiene, Health, Industry, Agriculture & Safety.

Allen Electric Company of Kalamezu's productions on Automobile, testers etc.

Still Films of Filmette Co. of New York's productions on Industry, Agriculture etc.

Still Films of Carter Carburetter Corporation on Automobile Engineering and Electricity.

The Still Films are on many subjects like Business career, Geography, Physical geography, Important towns, Communication and Transportation, Forestry, Maps, Science, Metals, Engineering, Welding, Nature study, Physiology, Hygiene and Health, Cartoon, Instruction, Economics, Physics and Mathematics, Safety, Industry & Agriculture.

There are also charts on Health & Hygiene by Denoyer Geppert Co., Chicago & on Traffic Safety by American Automobile Association, Washington.

Apart from these films on education, several films produced by Kodak Films Co. of England and other Films produced by Indian concerns are also shown. All the other films on Education, science particularly on Engineering, Health and Hygiene were taken by the undersigned during the tours in Europe, America and other Countries.

The projector used for Sound and Silent Films was manufactured in the Victor Animotograph Company which has been working for sound films from 1941 until now without any trouble and without any single disappointment but with very satisfactory results for all the time. Here it has to be particularly mentioned that the projection lamp has been changed only for the fourth time up to now. During this period it has been projected for about 3200 times and worked for about 900 hours. In one instance, last year the projector was working for 7 days - everyday from 7-30 P. M. to 7-30 A. M. Of course the quality of the crystal microphone has been slightly reduced. Most of the films are shown to students and industrial workers. Apart from this one Sound Film produced by Erpi Class Room Theatres in Tamil language by the undersigned on several subjects such as Agriculture, Industry, Health, Physics,

Engineering, Chemistry, Geography, etc. was very much appreciated by every one. As it was explained at American National School Administrator's Convention, St. Louis in 1940, the Government, Students as well as public decidedly realise that the best proof of the mass production way of the Education for the young minds is only the Visual Education.

G. D. NAIDU

Film Shows of U. M. S. Radio Theatre,
COIMBATORE.
Exhibited from Dec. 1940 to December 1944.

Operation and explanation by:

Mr. G. D. Naidu

Managing Agent:

United Motors (Coimbatare) Ltd.
Importers Ltd.. etc.
